The Text and the Intricacy of the Meaning Between the Poet and the Reader

By: Dr. Abdullah Al-Odhaibi

Abstract:

This research paper deals with one of the problems of reading the poetic text, which is represented in the relationship between the intentions of the poet and what the reader gets from the poetic reading. First, the researcher asks, whether the objective of any reading is to get to the objective of the poet from writing his text, or what is granted by the text itself. He indicates - in this context - a number of obstacles that many hinder the ability of the poet to communicate his idea to his reader. In order to disclose this and to explain some of the dimensions of the problems, the researcher, makes use of some of the poetic texts of Ghazi

For a complete version of the paper in Arabic see pp -
